**Mental Spaces in Grammar** Cambridge University Press
Conditional constructions have long fascinated linguists, grammarians and philosophers. In this pioneering new study, Barbara Dancygier and Eve Sweetser offer a new descriptive framework for the study of conditionality, broadening the range of richly described conditional constructions. They explore theoretical issues such as the mental-space-building processes underlying conditional thinking and the form-meaning relationship involved in expressing conditionality. Using a broad range of attested English conditional constructions, the book examines inter-constructional relationships. Within the framework of Mental Spaces Theory, shared parameters of meaning are shown to be relevant to conditional constructions generally, as well as related temporal and causal constructions. This significant contribution to the field will be welcomed by a wide range of researchers in theoretical and cognitive linguistics.

**La Mongolie Entre Deux Ères**

**Promises to Keep** Ember
Jay Marinitch, a young vampire hunter, may be Earth's best hope for thwarting the rise of a vampire-controlled slave empire called Midnight, despite his fear that those who question his worth may be right.

**Tense and Aspect in Bantu** Oxford University Press
Derek Nurse looks at variations in the form and function of tense and aspect in Bantu, a branch of Niger-Congo, the world's largest language phylum. His account is based on data from more than 200 Bantu languages and varieties, a representative sample of which is freely available on the publisher's website.

**Integrated Fish Farming** Taylor & Francis
If you are looking for wide-ranging international coverage of all aspects of integrated fish forming, this is the book you need. With a carefully selected and fully interdisciplinary collection of papers from experts around the world, Integrated Fish Farming provides thorough, detailed coverage of one of the world's most important approaches to integrated farming systems. Integrated Fish Fanning places IFF in a global context, reporting on case studies of successful IFF operations, experiments to enhance IFF performance, bioeconomic survey and modeling analyses, research on farm waste use and pond ecology, socio-economic elements of IFF extension and adoption, and the bio-technical and economic aspects of adapting IFF to reservoirs, marshlands, rice paddies, and marginal habitats. With contributions from leading international authorities and in-depth information from IFF operations worldwide, this is the definitive reference on Integrated Fish Farming.

**Environmental Change and the Autonomous Control of Tsetse and Trypanosomosis in Sub-Saharan Africa**

**The Evolution of Grammar** University of Chicago Press
Joan Bybee and her colleagues present a new theory of the evolution of grammar that links structure and meaning in a way that directly challenges most contemporary versions of generative grammar. This study focuses on the use and meaning of grammatical markers of tense, aspect, and modality and identifies a universal set of grammatical categories. The authors demonstrate that the semantic content of these categories evolves gradually and that this process of evolution is strikingly similar across unrelated languages. Through a survey of seventy-six languages in twenty-five different phyla, the authors show that the same paths of change occur universally and that movement along these paths is in one direction only. This analysis reveals that lexical substance evolves into grammatical substance through various mechanisms of change, such as metaphorical extension and the conventionalization of implicature. Grammaticization is always accompanied by an increase in frequency of the grammatical marker, providing clear evidence that language use is a major factor in the evolution of synchronic language states. The Evolution of Grammar has important implications for the development of language and for the study of cognitive processes in general.

**Essentials of Yoruba Grammar** University Press Plc Nigeria
In important respects, this book represents an independent approach to Yoruba grammar. It attempts to present the Yoruba language as it really is, rather than as seen largely from the perspective of other languages. The grammatical structure of the language is thus presented in a new way. The major parts of speech of the language are, for the first time, established uniformly on the criteria of function alone. A chapter is devoted to a systematic and novel treatment of each such part of speech, related both to the wide array of sentence types, and to its sounds and the way they are

combined in words.

**Elements of Modern Igbo Grammar** University Press, Nigeria

**International Comparisons of Household Saving** University of Chicago Press
Governments and corporations may chip in, but around the world houshold saving is the biggest factor in national saving. To better understand why saving rates differ across countries, this volume provides the most up-to-date analyses of patterns of household saving behavior in Canada, Italy, Japan, Germany, the United Kingdom, and the United States. Each of the six chapters examines micro data sets of household saving within a particular country and summarizes statistics on patterns of saving by age, income, and other demographic factors. The authors provide age-earning profiles and analyses of the accumulation of wealth over the lifetime in a clear way that allows quick comparisons between earning, consumption, and saving in the six countries. Designed as a companion to Public Policies and Household Saving (1994), which addresses saving policies in the G-7 nations, this volume offers detailed descriptions of saving behavior in all G-7 nations except France.

**A Transformational Grammar of Igbo** Cambridge University Press
Originally published in 1970, this is a descriptive linguistic analysis of the grammar of modern Igbo. The analysis, based primarily on material gathered from two native speakers, one from Owerri Province and the other from Umuahia Province, is presented in the framework of the transformational model developed by Noam Chomsky. The grammar is a practical attempt to apply some of the advances in theoretical linguistics to a little-known language. There is no other grammar of Igbo in existence which presents a comprehensive descriptive analysis of the underlying and surface systems of the syntax and phonology of the language. The book will be useful for linguists as an example of the application of the transformational model to an exotic language. It will be of interest to specialists in African studies for the insights gained and the data presented from an important African language.

**Kiss of Death** Ember
While on a school trip to Edinburgh, Scotland, sixteen-year-old Scarlett is reunited with Callum McAndrew, as well as her former St. Tabby's cohorts, providing plenty of suspects when she is targeted in a series of attacks.

**Dictionary and Grammar of the Kongo Language**

**The Hausa Language**
This book is a comprehensive grammar of Hausa, one of the largest and most important languages of Africa. Hausa is spoken by some 35 million people as a first language and approximately 15 million more as a second language. Paul Newman, a world authority on the Hausa language, draws on two centuries of Hausa linguistic scholarship to provide the most authoritative and detailed grammar of the language ever written. Unlike other grammars, this book is organised alphabetically. Readers will appreciate the ease with which they can find the specific individual topics that interest them. The grammar covers such expected topics as tonology, noun plurals, and verbal tense/aspect as well as often neglected topics, including verbal idioms, proper names, and language games. Newman also incorporates historical linguistic notes that explain and explicate current Hausa phenomena, especially puzzling anomalies, in terms of their Chadic and Afroasiatic origins.
