Before you set sail, familiarize yourself with the core mechanics that define Uncharted 4's gameplay. The controls are intuitive, but mastering the nuances can make a huge difference in combat and exploration.

- **Movement & Climbing**: Use the left stick for walking, sprinting, and climbing. Precision is key when scaling cliffs or navigating narrow ledges.
- **Combat & Weapon Switching**: The right stick allows you to aim, while the face buttons cycle through weapons. Don't forget the tactical switch to use your revolver in tight spaces.
- **Cover & Stealth**: Pull the left trigger to take cover. The stealth system is forgiving, but staying out of sight during patrols can save you from overwhelming firefights.
- **Inventory Management**: Press the options button to access your inventory. Organize gear by priority—ammo, health items, and upgrade components are essential for long expeditions.
